

# Do you think you have a medical problem related to your work?

- ▶ *Do your hands, wrists or neck ache, tingle or feel numb?*
- ▶ *Is your work repetitive, done in awkward positions or with force?*
- ▶ *Do you work with asbestos, solvents, lead or other dangerous material?*
- ▶ *Do you develop difficulty breathing on the job?*
- ▶ *Do you have unexplained skin rashes?*
- ▶ *Are any of your co-workers experiencing similar problems?*

## Call us — we're here to help!

Our physicians are specialists in occupational and environmental medicine. We are a non-profit occupational health center, part of a statewide network established by the New York State Legislature and endorsed by the NYS AFL-CIO.

We can evaluate your medical problem, develop a treatment plan, and provide assistance to reduce or eliminate workplace hazards. If the problem is work-related, we can provide the medical documentation to support a Workers' Compensation claim.
